

Køge, February 1st 2022

Dear clients,

As mentioned in our last briefing regarding EU's mobility package, we're forced to introduce a mobility package surcharge valid as of February 14th 2022:

| | |
|-----------------------------------|-----|
| Baltic States | 5% |
| Finland | 10% |
| Norway and Sweden | 15% |
| Finland to and from Norway/Sweden | 5% |
| Rest of Europe | 8% |

There's still uncertainty about the exact economic consequences, as accurate guidelines from the EU and local governments are still not available. This however does not change the implementation date of the regulation, which remains the 2nd of February.

We reserve the right to adjust this surcharge, as more clarity is available and hope for your understanding.

If any questions, your daily contact is always available for more information.

Kind Regards

NTG Nordic A/S
NTG East A/S
NTG Continent A/S
